

ELECTRICAL TESTING

Functional and safety tests for cells,
modules & battery systems

OVERVIEW OF OUR SERVICES

Humidity/Climate Testing

20 % to 98 % relative humidity
at a negative pressure of up to
40 kPa

Functional, Safety & Service Life Tests

Voltage ± 0 V to 1200 V
Current ± 1 mA to 3000 A

Development validation tests

Electrical, thermal &
mechanical

Analysis & disassembly of battery systems

Tab welding on battery cells & modules

Module Prototyping
